SUBSTRATE SELECTION

PARTICLE BOARD

- Structure: Raw wood scraps+MDI for-maldehyde free adhesive formed at high temperature and high pressure, with melamine impregnated film paper pressed onto the surface
- Advantages: High cost-effectiveness, excellent nail grip, and resistance to deformation

SUBSTRATE SELECTION

PLYWOOD

- Structure: 9-11 layers of plywood are laminated in a criss cross pattern, with double-sided veneer or melamine finish.
- Advantages: The highest strength, bending resistance, cracking resistance, suitable for ultra-high cabinet doors

MDF

- Structure: Wood fiber environmentally friendly adhesive hot pressed, density ⩾ 750 kg/m ^{3}, smooth surface without pores
- Advantages: With the strongest styling power, it can be CNC carved, milled, and curved door panels, suitable for European and American carving.

SOLID WOOD

- Structure: The entire board is directly assembled or finger jointed, with a surface that is open/closed with clear varnish and wood wax oil, while retaining the natural texture of the conduit.
- Advantages: Warm texture, can be repeatedly polished and refurbished, with natural zero formaldehyde environmental indicators

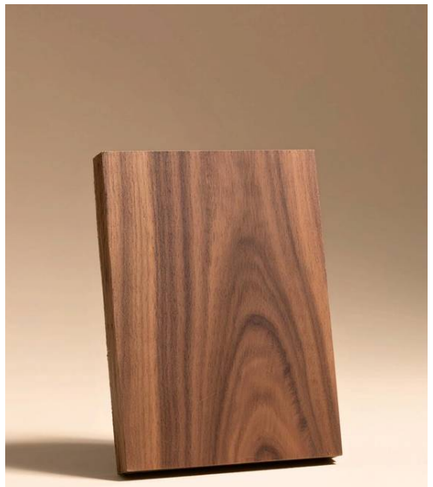

OSB

- Structure: Vertical and horizontal three-layer directional paving with long wood planing+MDI formaldehyde free adhesive hot pressing molding
- Advantages: Strong nail grip, deformation resistance, moisture resistance superior to particle board, and more stable overall cabinet

ELM WOOD

SOLID WOOD TYPES

The natural color of raw wood
discerning its texture at a glance
choosing wood is like choosing life

SOLID WOOD TYPES

White oak:
Clear mountain patterns, firm texture, versatile light yellow base color.

Red oak
rough texture, obvious ducts, corrosion-resistant and wear-resistant.

walnut wood
chocolate color+parabolic "big mountain pattern", with a stable color that becomes smoother with use.

Cherry wood
Warm red base color+delicate straight lines, darkens with oxidation over time, comes with a "retro filter".

White wax wood
straight and coarse grain, with a milky white base and light brown lines.

Beech wood
fine straight grain, soft color tone, high hardness, steam bendable.

Rubber wood
light yellow brown with diagonal straight lines, high cost-effectiveness, easy to dye.

Teak wood
golden brown color with ink lines and oil shadows, containing natural grapefruit texture, moisture-proof and insect proof.

Elm wood
with obvious depth contrast, high hardness, and wear resistance

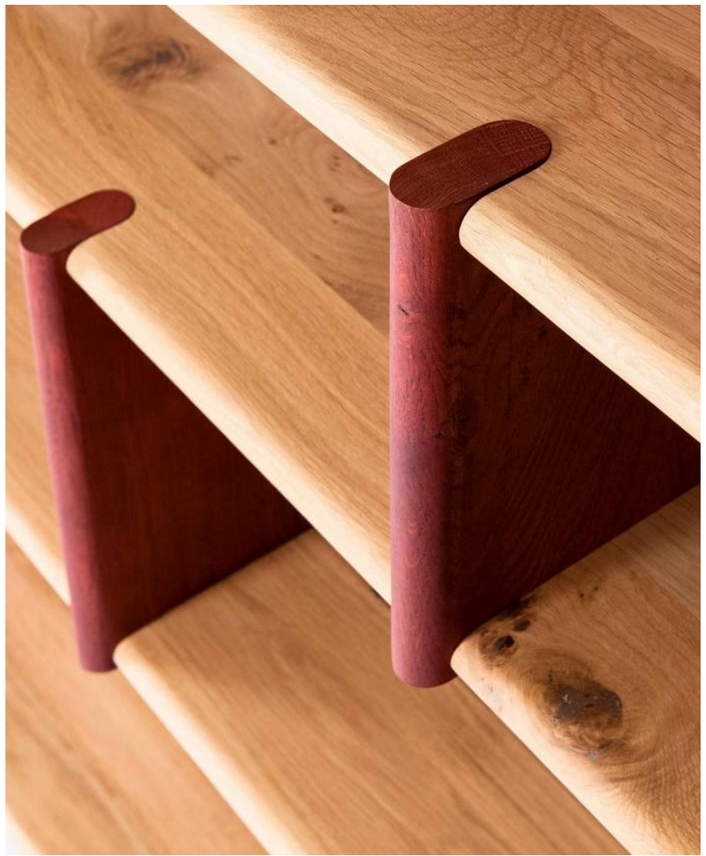

Special craftsmanship in cabinet design

02

SPECIAL PROCESS

SKIN FEEL DOOR PANEL

The surface of the substrate is covered with an extremely thin layer of polyester film (PET film), which is then pressed and bonded under high temperature and high pressure. The surface of this film has been treated with a "skin feel" treatment, which feels delicate, soft, and slightly warm like baby skin, without the cold reflection of high gloss door panels, presenting a high-end matte texture.

MIXED OIL DOOR PANEL

After repeatedly scraping putty and polishing on solid wood or density board substrates, opaque colored paint (mostly polyester paint or water-based paint) is sprayed to form a paint surface effect that completely covers the wood grain, has uniform color, and delicate touch. Simply put, it means using the door panel as a canvas, painting whatever color you want, and ultimately presenting a high-end texture of "paint integrated".

ARC PROCESS

Turning the originally square cabinets, door panels, and wall panels into smooth arcs through hot bending or manual methods not only "heals" the stiffness of right angles, but also solves the safety hazards of collisions.

SPECIAL PROCESS

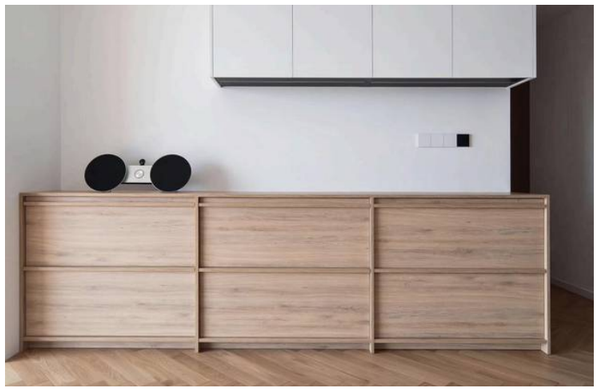

HAITANG CORNER

Cut the corners of the sun into symmetrical small slopes and then round them, resembling the petals of a crabapple, which is both anti-collision and exquisite.

SKELETAL LINE

The surface of the door panel is milled with fine grooves, forming a "bone like" line, minimalist and three-dimensional.

BEVEL

The edge of the door panel is slanted at a 45 ° angle, serving as both a door panel and a handle, eliminating the need for exposed hardware and making it extremely simple and neat.

FILLING

Two layers of veneer with the same color core material sandwiched in between, without any layering lines when viewed from the side, forming a seamless whole.

MILLING TYPE

Use CNC to carve various lines, grooves, or curved surfaces on the board, with free styling that can be retro or modern.

GRILLE

Arrange wooden strips vertically or horizontally equidistant to create wall panels or cabinet doors that are breathable and have strong light and shadow layers.

Thousands of colors to choose from
locking in the atmosphere of home at a glance

STYLE SELECTION

Choose different home styles according to your needs and preferences

SELECTION OF CABINET TYPES

MODERN

The handleless flat door is equipped with metal edging and light strips, with stone patterns, baked paint and glass interlocking, emphasizing suspension, interweaving, geometric proportion, with few and precise color blocks, and functional modules hidden in the wall.

MINIMALIST

Pure white or light gray matte door panel, no handle rebound opening, internal aluminum frame structure, all storage invisible, leaving only horizontal lines and shadow seams, presenting an "empty" order.

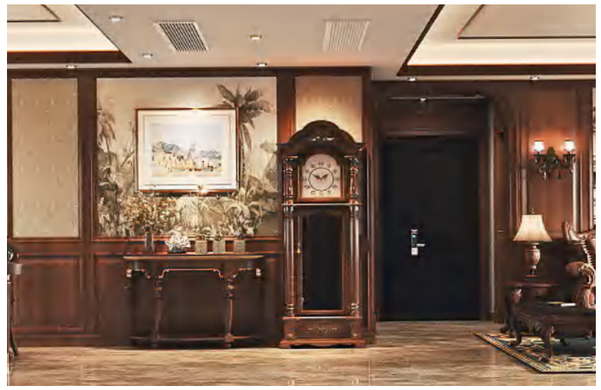

EUROPEAN

Ivory white vacuum formed carved door panel, Roman column, top line, and skirting line in three sections, copper retro handle, symmetrical layout, creating a sense of palace ceremony.

RETRO

Deep walnut and brass old handles, frame line+glass+rattan combination, symmetrical high cabinet with top line carving, warm yellow lighting, creating a cinematic sense of the era.

LUXURY

High gloss rock board or baked paint door panel, equipped with metal frame lines, tea glass and light strips, commonly used deep coffee+gold/copper contrasting colors, open grid for wine cabinets and displays, with lighting levels highlighting texture.

AMERICAN

Wide solid wood frame door, antique crack paint, copper black handle, deep top line and thick countertop, mixed open bookshelf and wine compartment, stable retro style.

SELECTION OF CABINET TYPES

JAPANESE

Light colored oak or white wax wood, wicker and grille doors, low cabinet height storage, movable shelves and drawers, emphasizing ventilation, moisture resistance, and room order.

ITALIAN

Matte rock board or cement grey door panel, extremely narrow aluminum frame glass door embedded with light strips, module interweaving, deep coffee wood veneer embellishment, showing a calm sculptural feeling.

FRENCH

Cream white or sage green, curved top line, copper gold carved handle, a mix of Changhong glass and mirror, with jewelry drawers inside, romantic and exquisite.

MEDITERRANEAN

Blue and white antique wood grain door panels, arched open grids and wicker baskets, copper green wrought iron handles, like vacation storage items brushed by the sea breeze.

SOUTHEAST ASIA

Teak or walnut moisture-proof high legged cabinet, wicker louvered doors, copper handles, dark green walls with palm leaf wallpaper, creating a tropical vacation atmosphere.

NORTHERN EUROPE

White oak or birch veneer, black slender handles, combination of high and low sided cabinets, white walls, green plants and book decorations, natural and light.

SELECTION OF CABINET TYPES

LOG

Straight grain white oak or cherry wood, staggered open compartments and drawers, no handle milling grooves, extended countertops and walls of the same material, creating a warm and enveloping feeling.

MEDIEVAL

Teak or walnut curved door panel, brass round handle, color blocked drawer, warm light inside glass display cabinet

PASTORAL

Mibai vacuum formed floral waistline, curved top Roman column, copper antique handle, wicker basket and hook

WABI-SABI

Micro cement or old wood veneer door panels, with white and incomplete textures, copper black old handles, low saturation lighting, and a peaceful sense of time.

BAUHAUS

Black and white gray color matte paint module, aluminum frame glass and metal mesh, function first, geometric proportions like architectural drawings.

CHINESE

Dark walnut or rosewood, with patterned copper handles and square feet, symmetrical high cabinet with moon hole door, and tea drawer inside, stable and elegant.
